

School Effectiveness K-12 Literacy

The Lexile Framework for Reading Webinar Training Sessions

*Sponsored by the Arizona Department of Education
&
MetaMetrics*

The Lexile Framework for Reading is an educational tool that has been developed to measure reading comprehension and text difficulty by placing readers and text on the same development scale. Although Lexiles do not equate to grade levels, the measure that a student receives through this assessment link helps connect the reader with books, periodicals and other resources optimal for the individual's reading success.

Five free webinars have been scheduled, which will provide an overview on The Lexile Framework for Reading and the opportunities it provides for supporting differentiated instruction. A webinar is an online event that combines PowerPoint presentation and conference call. [Click here](#) for additional information on how a webinar works.

Since available phone lines are limited for each of the webinars, we strongly suggest local interested teams have one person register. The other team members may join the registrant, at a single location, to listen in.

Note: If you are unable to attend the event you may view the prerecorded training session, accessible soon on the ADE K-12 Literacy web site, [“The Lexile Framework for Reading”](#) link.
